ABOUT SWaM 2026

The SWaM 2026 conference, jointly organized by the Department of Irrigation and Drainage Malaysia and Malaysian Stormwater Organisation (MSO), is set to be a pivotal event focusing on stormwater management in terms of both quality and quantity. Its primary emphasis lies on enhancing climate resilience in stormwater management, acknowledging the significant impacts of climate change on the country.

OBJECTIVES

01

To disseminate information to stakeholders on the importance of stormwater management resiliency for future developments;

02

To promote latest approaches including nature inspired solutions in stormwater management for climate resilience.
